Good afternoon,

This letter is to show my interest in the recent job posting for a Software Engineer at your firm. Based off of your job description, I believe that my technical experience can be an excellent asset to your company.

After finishing App Academy (3 month course with < 3% acceptance rate), I have developed applications using the modern tools and frameworks with efficient coding. I have experience building applications from the ground up, from focusing on backend strategies that produce faster retrieval time to separating the slice of state in the frontend for React Components. Additionally, I have the ability to comprehend material quickly, which can be seen through this course where I learned these frameworks (Rails, React/Redux, SQL) in a very short amount of time (3 months).

Looking through your job description, I highlighted some of my qualities that I believe can contribute to the team:

- React and Redux: Recycled components through React's framework and stored information through the Redux cycle (projects: [Wondernote](#)).
- CSS: Familiarity in transitions and animations to improve navigation and aesthetics of the application (projects: [SmartRocket](#), [Wondernote](#)).
- UX/UI: Finished a course for user experience (CareerFoundry) that taught me best practices for product development, cross-functionality, wireframing and product architecture.
- Ruby on Rails: Implemented the structure for RESTful API calls that passed data through JBuilder; structured the tables to reflect faster search and storage of user data (projects: [Wondernote](#)).

As long as I could remember, I really enjoyed the learning process. Learning new frameworks and tools can be difficult initially, but the feeling you have when your product comes to life is truly an amazing moment. I want to continue on applying these skills and discover new methods/techniques to improve forward. I believe your company would be a great fit since it promotes learning and growth from its employees. If you want to take a further look at my projects, you can view my [website](#) or [resume](#).

Thank you for the opportunity and hope to hear from you!
